ABOUT ME

Hello! My name is Griffin Matthews, i am currently looking for a front end development job. I specialize in JavasScript, and have experience working with React, TypeScript, SCSS, NodeJS, MongoDB, Express, HTML, GIT, and Python. I love problem solving, and especially love solving coding problems on LeetCode, and Code Wars i have solved over 100 problems on LeetCode. You can message me on LinkedIn or email me at Griffinmmatthews@gmail.com if you would like to get in touch!

You can find my work here in my Project Portfolio

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS

Frameworks and Libraries: BootStrap, SASS, JQuery, Redux, React, TypeScript, React Native, ReactStrap

Other: JSX, GIT, VSCode, NPM, Yarn

PROJECTS

Movie Mania | *Javascript, React, SCSS, API*
- Live Site
- Movie Mania is a fully responsive movie database, allowing users to filter, search, rate and view information on thousands of movies. Users can keep track of their thoughts on certain movies, and even keep a list of all their favorite movies. Movie Mania uses the TMDb api to fetch information, and post users ratings.

Wordle Clone | *Javascript, React, CSS*
- Live Site
- Using React, Hooks, CSS, i recreated the popular game wordle, it takes an answer checks if it is correct and returns hints to what the answer is.

PokeDex | *Javascript, React, Redux, CSS*
- Live Site
- Using React, Redux, Hooks, JSX, and Bootstrap you are able to search though 151 different pokemon, 11 different gym leaders, capture pokemon from various areas to add to your team, and create teams of 6 pokemon.

POP Pizza | *JavaScript, HTML, CSS*
- Live Site
- Using Javascript, HTML, and CSS i created a website for a pizza restaurant that allows you you to see the menu, create random pizza combinations, contact the restaurant, place a reservation, and buy a gift card.
